

Your Recovery Tracker

Every person's recovery from TAVR is different - from how long you stay in the hospital to how long it takes to feel normal again. You can enhance your recovery by monitoring your progress every week.

The TAVR Recovery Tracker helps you keep track of several important areas of your recovery including any notes, concerns, or questions you may have following your TAVR procedure.

Bring this with you to all of your follow-up doctor's visits to help inform your doctor about any important updates in your recovery.
